3:00 ___ 3:30 ___ 4:00 ___ 4:30 ___ 5:00 ___ 5:30 ___ 6:00 ___ 6:30 ___ 7:00 ___ 7:30 ___ 8:00 ___

Please read guidelines below for exhibiting poultry.

POULTRY TESTING

The agency of Agriculture, Animal Health Section will be providing on-farm testing for Pullorum-typhoid(PT) disease for the exhibition of domestic fowl until June 15 of this year. After that date, several clinics will be held throughout the state to accommodate those who where not able to schedule with the Animal Health Section. Locations and dates will be dependent upon demand. Also, PT testing will be available at the four swap sales held by the VT Bird Fancier's Club. The Animal Health Section would also like to conduct some Avian Influenza and Exotic Newcastle disease surveillance with the cooperation of poultry owners. Tests will be provided free of charge. As a reminder, according to the Vermont Administrative Code, F6.114 Exhibition of Domestic Fowl,

"Domestic fowl shall not be offered or accepted for exhibition purposes at any fair, show, meet or any even where such fowl are assembled unless the owner or keeper has acquired a certificate of health from the responsible State Livestock Official in the state, province or country or origin; such certificate of health shall include that the fowl offered for exhibition have been tested and found negative for pullorum-typhoid disease or originate from a pullorum-typhoid clean or passed flock, tested within the past 12 months. Chicken born after April 1, 2005 do not need to be tested."

To schedule testing please contact Vermont Animal Health at (802)828-2421. For information regarding the prevention and spread of disease, consult www.aphis.usda.gov/vs/birdbiosecurity
